

# CONSTRUCTION UPDATE

## 2011 Dakota County Overlays

June 1, 2011

Thank you for your patience while we make improvements to the surface of the roadway.

### WHAT'S BEING DONE?

This year Dakota County will rehabilitate approximately 20 miles of pavement. The 2011 overlays include work on County Roads 5, 9, 11, 47, 56, 73, and construction of a bike trail along County Road 56. A map is attached on the backside of this update showing the construction locations.

This year's contractor, McNamara Contracting, Inc., will be removing and replacing asphalt on the driving lanes and shoulders. The end product will be a better looking, longer lasting and smoother roadway.

In addition to new pavement, sections of concrete curb and gutter will be removed and replaced along County Road 11. Other work includes replacing loop detectors for the signal systems, improvements to city utility structures (catch basins, manholes, hydrants, etc.), and replacing some pedestrian curb ramps.

### WHEN WILL WORK TAKE PLACE?

Work on County Road 11 from County Road 38 to Trunk Highway 13 is scheduled to begin June 2 with the replacement of loop detectors and saw cutting concrete curb. The utility improvements will begin the following week and work will continue through June. Then, in early August the existing pavement will be milled and paved. The gap in the schedule is necessary to coordinate with adjacent city roadwork projects.

### WHAT SHOULD I EXPECT?

The road will remain open to traffic and you will have access to your property throughout construction. While the contractor performs these operations, you may encounter lane closures and a short delay. For the safety of both the residents and the workers, we ask for your patience.
